

Limited Lifetime Warranty

The Longden Grip is covered by a return to base lifetime warranty which commences from the date of first registration.

The Longden Grip is warranted against defects in materials and workmanship. The warranty is limited to replacement of the defective item.

Your warranty does not cover the following:

- damage caused by an accident, fire, theft or moving objects striking the Longden Grip.
- damage caused by industrial fallout, chemicals, sealants, salt, etc.
- damage caused by misuse or abuse.
- damage caused by general wear and tear.

LONGDEN *LEARNING*

At LongdenCorp our philosophy is to show riders that whatever standard they are, and wherever they live in the world, they can improve their riding and build up a feeling of well-being, confidence and enjoyment.

Mary's Philosophy is that "Everyone who wants to ride well can". As she says, "I believe that every horse and rider combination is unique. This means that riding is never boring and is always a personal challenge. It is a journey with your horse that you both want to enjoy. Together you grow. It does not matter what standard a rider you are. When everything is correct you have the feeling of being a part of your horse. It is a beautiful feeling. It is riding 'with' your horse rather than 'on' your horse".

LONGDEN **GRIP**

USER GUIDE

"THE BEST THING SINCE STIRRUPS WERE INVENTED."

*Please read these User Instructions carefully before
using the LongdenGrip*

Congratulations

The Longden Grip you have chosen is constructed of the finest materials. This product requires particular care, so please read the following instructions.

The Longden Grip is a patented, new and innovative stability aid for riders of all ages and skill levels who are seeking additional security as they develop their balance, seat and riding skills. It is also ideal for those wanting extra security when riding a young horse, bringing a horse back into work, or riding a horse they are not quite sure of.

Instructions for Use

The Longden Grip is a stability aid which is designed to provide riders with an easily reachable solid handhold should they become unbalanced or unstable in the saddle.

Simply grasp the padded bar section with either or both hands and brace yourself, taking care to maintain contact with the reins at all times. Release the bar when you have regained your balance or repositioned yourself to a more stable position.

Warnings

The Longden Grip is designed for use as a stability aid only and is NOT intended to be a safety device.

Do not tie, attach or fasten any item or article to the Longden Grip for any reason

Do not use the Longden Grip as a handhold for mounting or dismounting the horse.

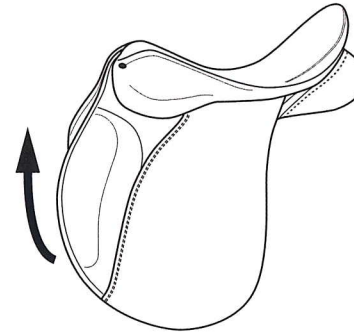

Only fit the Longden Grip as shown. Failure to do so may result in discomfort to the horse, or excessive movement of the grip.

Fitting Instructions

Whilst it is possible to fit the Longden Grip to a saddle already on a horse, for ease of fitment we recommend fitting the Longden Grip prior to saddling the horse.

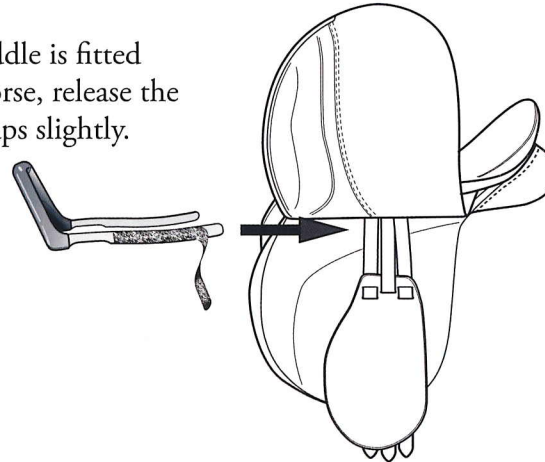

Step 1.

Lift the saddle flaps, to expose the girth straps.

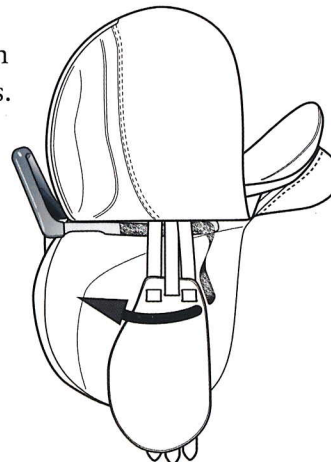

Step 2.

If the saddle is fitted to the horse, release the girth straps slightly.

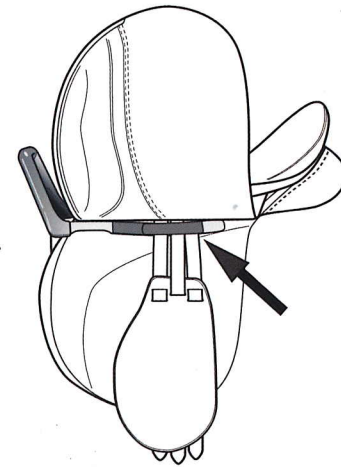

Step 3.

Slide the Longden Grip in and under the girth straps.

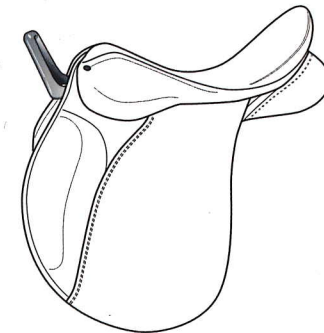

Step 4.

Wrap the velcro strap around the girth straps to locate the Longden Grip. If the saddle is already fitted to the horse, re-tighten the girth straps.

Step 5.

Reposition the saddle flaps.

Note: To remove product reverse the above steps.

Care/Cleaning

Your Longden Grip is designed to provide years of maintenance free service, however, we recommend regular cleaning for hygiene and care of the product. After use, clean the Longden Grip with a mild soap and water solution.

Do not use alcohol or petroleum based cleaners, solvents, or harsh abrasives. We do not recommend the use of plastic protectant products as these can make the surface of the grip slippery.
